Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- A stronger storm over the western Pacific is forecast to reach the West Coast by this Thursday. This storm may produce moderate snow amounts, with lighter rain and snow for lower elevations. Gusty winds are also expected by Thursday as this storm approaches.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

A period of light rain and snow will be possible during the morning hours today as a weak front moves across the region. Mid to late week a strong storm system may bring wind and rain to the area.

Medford Weather:

Aside from wintry conditions this morning, the front will produce only light precipitation and little else as it pushes headfirst into the blocking ridge overhead. This system will move the ridge away, allowing the preferred storm track to return to the Pacific Northwest. The first of these storms is due Tuesday afternoon and evening, bringing a round of rain and snow to the area, followed by showers into Wednesday. A bigger, and much stronger, storm event is forecast for late Wednesday night into Thursday.

Reno Weather:

High pressure will result in valley inversions and deteriorating air quality through Wednesday. A modest winter storm will bring strong gusty winds and mountain snow late Thursday and Thursday night. The main storm track will stay north for next weekend with generally dry conditions and seasonably cool temperatures.

San Francisco Weather:

A weak frontal system may produce light rain today, mainly near the coast and in the North Bay. Otherwise dry weather is expected through Wednesday along with warmer temperatures. A stronger Pacific storm will likely bring rain and gusty winds to the region on Thursday.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Another cold morning is expected today. A few showers are possible through Wednesday. The next storm system arrives Thursday with wet and windy weather.

Hanford Weather:

Low pressure over the Great Basin will continue to move east out of the central California region overnight. High pressure will then prevail through Wednesday before the next Pacific weather system moves into California on Thursday.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Temperatures will warm to above normal by midweek as high pressure builds aloft and offshore flow continues. A trough of low pressure will bring cooling and a chance of rain late in the week, mainly north of Point Conception. Warm and dry weather will likely return for the weekend as a ridge of high pressure moves into place and offshore flow redevelops.

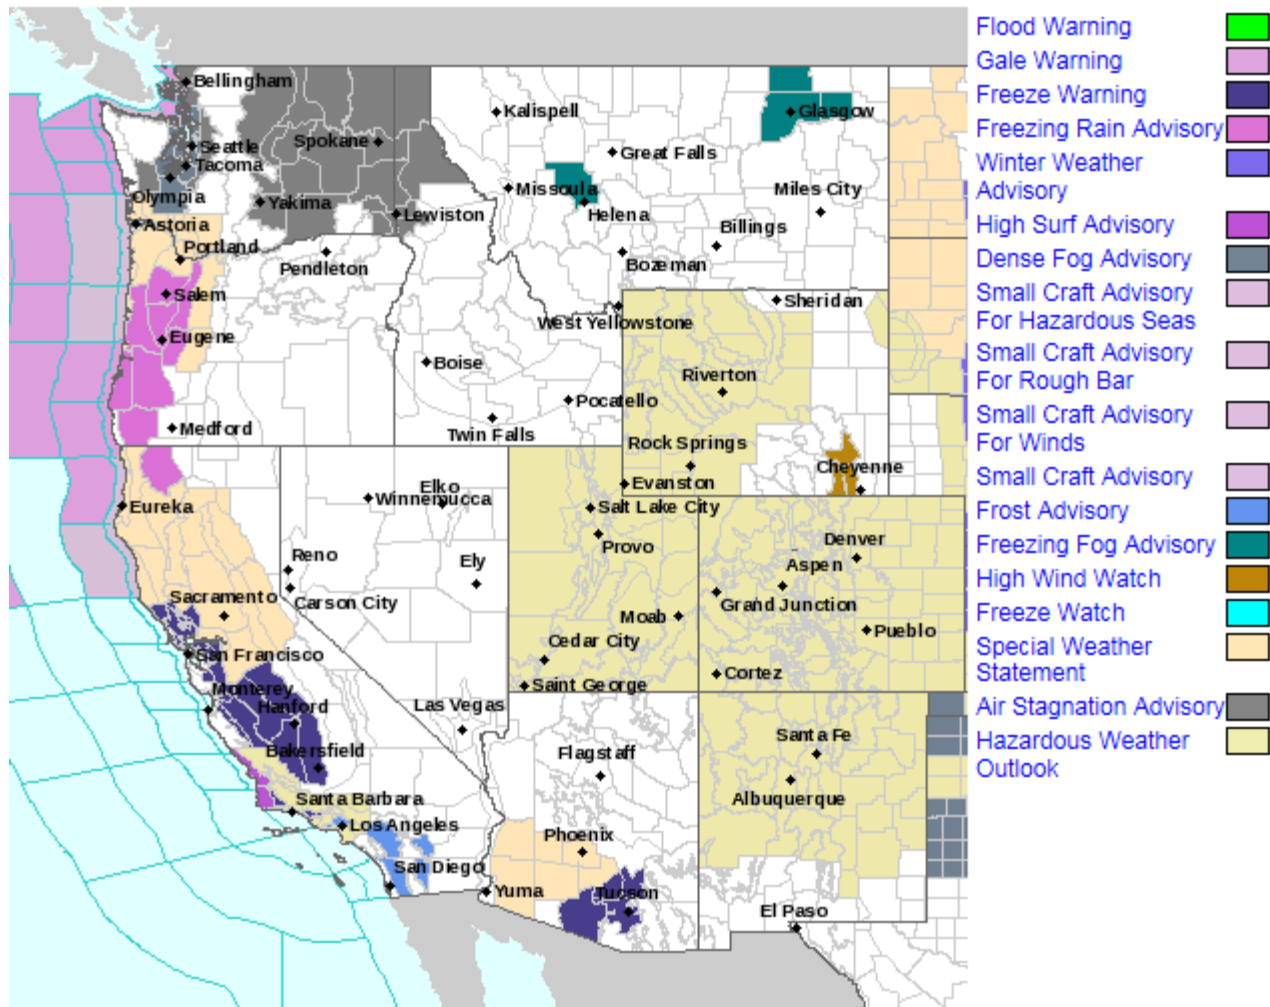

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

Gradually warmer through Wednesday, although the nights will continue to be quite cool with frost in the valleys and portions of the deserts. Cooler conditions expected late in the work week with gusty westerly winds and a slight chance for precipitation Thursday night through Friday. Then dry and warmer again for next weekend as high pressure rebuilds.

Southeast California Weather:

Below normal temperatures will continue today and Tuesday with some lower desert spots dipping below freezing during the morning hours. A warming trend is expected Wednesday and Thursday as a ridge of high pressure builds over the region. Somewhat cooler conditions are anticipated next weekend but still near normal. Breezy conditions can be expected from time to time as well.

STATE WEATHER MAP

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC every other Monday at 1100 hours.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought
